The whole process begins with the authorization or the ‘SPACES’ in the Army that must be filled.

DA POLICY gives manning guidance for prioritizing personnel fill and rules for assigning Soldiers.

‘FACES’ are the Army’s inventory of Soldiers to fill the spaces described in authorization documents.

Enlisted Targets are EPMD’s plan for distributing the faces across the spaces according to DA Policy and the CG’s and Director’s guidance.

The Synch Matrix aligns EPMD activity with Unit Operational Schedules.

REQUISITIONS are built by Readiness Division to identify a particular targeted space at a unit that must be filled.

ASSIGNMENTS are generated when the Career Divisions assign a face to a requisition.
